

HEIMDALL

Comprehensive Pig Farm Solutions.

Company Profile

HEIMDALL

PORK

powered by byobafrica ltd.

About Us:

We are the leading provider of end-to-end pig farming solutions in Nigeria, proudly offering comprehensive services that cater to the diverse needs of our clients.

From designing and constructing efficient and environmentally sustainable pig farms to fully setting up and stocking them with high-quality animals, we take care of every aspect of the pig farming process for our clients.

Our company is the only one in Nigeria to provide this complete, all-inclusive service.

VISION :- *become a major pork source in Africa by 2030.*

Our Mission:

To revolutionize pig farming in Nigeria by delivering high-quality, scalable, and sustainable pig farming solutions tailored to meet the unique needs and budgets of our clients.

Pork is one sector that has been grossly under valued in Nigeria and most of Africa for many cultural reasons.

Despite this, the sector is currently valued above N3trillion. And the demand and consumption is increasing exponentially.

Over 80% of pork currently consumed in Nigeria is imported. (hard to believe, but very true).

To meet local demand alone, Nigeria will need to produce at least 1.3 million tonnes a year but is currently struggling to produce 250,000 tonnes a year.

Although a few qualified investors are beginning to see the potential of the sector and invest in it, the great portion of the sector (over 96%) is controlled by traditional farmers with little real education or infrastructure about the modern systems of pork production.

We aim to empower farmers and investors to achieve profitability while contributing to the agricultural development of the nation.

What We Offer:

Grilled pork

Worldwide Pork Market was valued US\$ 254.53 Billion in 2022.

Farm Design and Construction:
Customizable farm designs to suit the client's budget and specific requirements. High-quality construction using durable materials to ensure long-term functionality and cost-efficiency. Modern facilities equipped with systems for optimal productivity.

Farm Setup:
Full farm setup, including pens, feeding systems, water supply, ventilation, and waste management systems. Stocking the farm with healthy, high-yield pig breeds sourced from reputable suppliers either locally or abroad.

Farm Management (Optional):
Many qualified clients may not have the time to directly manage the farm. We offer a full service in this regard . This will include professional farm management services to ensure smooth operations and high productivity. Veterinary care and health monitoring of animals. Staff training and oversight to maintain operational standards.

Flexible Solutions for All Farm Sizes:
We cater to farms of all sizes, from small-scale operations to large commercial enterprises. All solutions tailored to fit the client's budget while maximizing profitability.

Why Choose Us?

Passion, Commitment, Experience, Expertise:

Those four words summarize our capacity. We have a network of architects, agricultural engineers, livestock experts, waste management and feed formulation experts and experienced farm managers dedicated to delivering top-notch solutions on all fronts of the project.

Comprehensive Service:

We handle everything from design and construction to management, ensuring a seamless experience for our clients. No other company can currently do this with thorough professionalism under one roof in Africa.

Customized Approach:

Each project is uniquely tailored to the client's vision, goals, and resources.

Guaranteed Quality:

We are committed to providing high-quality services and livestock to set our clients up for long-term success.

Proven Track Record:

As pioneers in complete pig farming solutions, our reputation for excellence and reliability speaks for itself.

How We Work:

Step 1:

Initial Consultation.

We discuss your vision, goals, and budget to understand your needs.

Step 2:

Feasibility Study.

We conduct site assessments and market research to determine the best approach for your farm.

Step 3:

Design and Planning.

Our team develops detailed designs and plans, including cost estimates and timelines.

Step 4:

Construction and Setup.

We construct your farm to the highest standards, ensuring compliance with all regulations. We set up all infrastructure and stock the animals according to the established production plan.

Step 5:

Launch and Support.

We provide operational training and ongoing support to ensure your farm's success.

Contact Us:

Are you ready to start or expand your pig farming business?

Contact us today for a consultation and let us help you bring your vision to life.

Let us take the hassle out of pig farming and help you build a profitable, sustainable business from the ground up!

Pork accounts for 40% of all meat consumed around the world, making it the most consumed animal protein worldwide.
